

Practical Application of CSVC Steel – Construction

With the motto "Our Quality - Your Better Life", CSVC has launched high - quality steel products to meet the needs of many customers including choosy ones.

Since its Official Commercial Operation, CSVC's steel has been shipped in large quantities, so **which companies have bought our steel and what do they use our steel for?**

In fact, both domestic and foreign enterprises buy our steel to cater for many sectors such as construction, mechanics, electricity - electronics, home appliances, automobiles ... In the piece of writing this time, we will mention some typical products in the field of **construction** as Galvanized, Galvalume, PPGI, steel pipe and purlin; and some domestic typical units using CSVC steel to produce these products as Ton Dong A, Bluescope, Ton Phuong Nam or SMC, PebSteel and Hoa Phat.

Total shipment of CSVC for 6 companies: Ton Dong A, Bluescope, Ton Phuong Nam, SMC, PebSteel and Hoa Phat.

COMPANY	YEAR	QUARTER	QUANTITY OF SHIPMENT (MT)
Ton Dong A, Bluescope, Ton Phuong Nam, SMS, Pebsteel and Hoa Phat	2016	1 (Jan to Mar)	32,834
		2 (Apr to Jun)	32,667
		3 (Jul to Sept)	28,486
		4 (Oct to Dec)	25,978
	2017	1 (Jan to Mar)	16,389
		2 (Apr to Jun)	20,515

According to figures in the statistics, ASCR is sold with highest volume, followed by GI, CR and PO.

Compared with the time before, those shipments catered for construction field has decreased significantly. It's due to the change in Company's strategy which moves its focus to more potential customers in other sectors such as automotive, electronics or electrical household appliances... to increase product value as well as improve revenue from sales for CSVC

Hope that this short information will make you have an overview over the actual application of our steel. We will continue to introduce the real application of CSVC steel in the next Newsletters. Thank you for your watching!

Based on Source: P5 – QA & QC

Introduce Workplace – Maintenance & Engineering (P6)

Mr. Takahisa Kobuchi - AGM

"Occupational safety & health are top priorities at workplace. Therefore, let's start a new working day by greeting "LUON AN TOAN". It can not only remind yourself and your coworkers of all safety regulations but also help you all stay safe and sound as when you come to the Company."

Mr. Chen Pao Chung - GM

P6 (Maintenance & Engineering) is a combination of many sections with different functions such as repairing, improving and managing equipment in CSVC. With the motto "LUON AN TOAN", P6 cooperates with other production departments to carry out and many tough and dangerous tasks and contribute to the overall success of CSVC.

Although serving only half-year as P6-GM but everybody always remembers him as a diligent and friendly manager.

Mechanical Section – P61

LUON AN TOAN

"The mission of **P61** is maintaining mechanical equipment for the whole production lines, ensuring operation stably and continuously. Aiming at the target "safety, quality and efficiency", our section constantly makes effort to enhance professional skills, knowledge and develop sense of responsibilities among all members to attain final successful result."

P612 is in charge of maintenance at CAL & CGL

P613 is in charge of maintenance at AGL & PKL-INL-RCL

P611 is in charge of maintenance at PLTCM & ARP

P614 is in charge of night shift maintenance

Electrical Section – P62

Working on the same mission with P61, P62 is in charge of maintaining electricity system and computer system Level-1 & Level-2 of the Company. We are always in control of the systems and act as a bridge between production system and data management system.

P62! We are a small family!
Always as branches of same tree,
 It is **Calm** that illuminates our way ahead,
 Identify and **Control** all potential hazards
 With **active** brain and determination to develop,
 We make **all systems** work smoothly.

Crane & Utilities Maintenance Section – P63

aware of “Safety First” and work with the motto “Always Safety”.

Side by side with Crane maintenance team is Utilities maintenance team. Despite effects of bad weather when working outdoors, we always work hard to effectively accomplish all tasks and suggest equipment improvement to supply the best “utility services” for the whole factory.

Keep all equipment and functions on EOT crane in the best status and highest stability in order to facilitate not only production lines and product warehouse but also maintenance jobs of P6’s big family. Due to the job characteristic which requires working at heights, EOT crane maintenance team are always

Equipment Management Section – P64

P64’s duty is to maintain systems/equipment in the Administration Building & Dormitory of CSVC. Especially, P64 also supports other Sections (P6X) in preparing paperwork for purchasing Outsourcing maintenance service and managing all P6 ISO document.

Warehouse Section – P65

P65 section duty is managing and delivering tools and spare parts to the whole CSVC.

CSVC Activities

Holding outdoor trip and gift giving for children of CSVC Employees on 22nd July, 2017

Holding outdoor trip and gift giving for children's employees has become an annual activity of CSVC. With the aim of bringing the children a meaningful summer, creating a good playground and an opportunity to exchange knowledge as well as boost their creativity.

The company cooperated with the Trade union to organize a visit for the children at Vietopia Children's Entertainment Center (District 7, HCMC) and presented 19 gifts to students who have good academic qualifications on 22nd July.

The program ended in successfully and left an unforgettable impression on their mind. Hope that they will try harder, strive more in learning and training. In addition, this is a small gift for parents to witness the joy of their beloved children.

Pictures of children in Vietopia

Children have chanced to participate many different career paths such as paramedics, doctors, nurses, police...

Ensuring workplace safety for employees is always the biggest concern of CSVC Top Management. To handle this problem, many outstanding activities for ensuring OSH and fire prevention have been enhanced and implemented at the Company over the past period of time as follows

Invested in training equipment and developed a professional training team to raise awareness of employees about real danger at work. The activity started from May 2017 and expected to last until the end of Sep 2017.

Cooperated with Fire Prevention & Fighting Police Division No. 3 to organize periodical firefighting training for total 96 employees on consecutive 02 days 25th and 26th May, 2017.

Propagated and organized some events responding to the Action Month on Occupational Safety and Health for the 1st time in 2017.

Also over the last few months, some accidents have occurred in CSVC and the main cause to most of the cases is not to comply with safety regulations as well as safety condition confirmation. Safety training can achieve highest effectiveness only when awareness and responsibility are maintained. Therefore, hope we all strictly comply with Company's safety regulations to avoid similar situations happening again in the upcoming time and also in the future.

Held 1st phase of periodical health check for 566 employees on 17th, 23rd, 26th May and 1st June, 2017.

Job Fair at Ba Ria – Vung Tau Employment Support Center

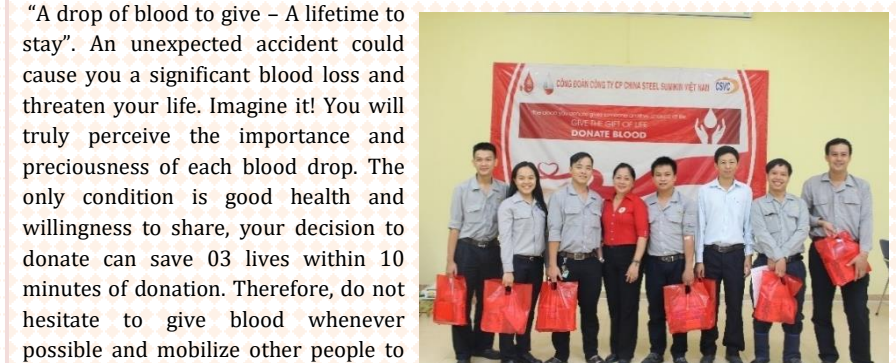

Voluntary Blood Donation at CSVC with the topic “A drop of Blood to give - A Lifetime to Stay”

With an effort to save life of those less fortunate, bring them light and restore their faith in the existence of humanity, in the morning of Jul 14th, 2017, CSVC Trade Union Executive Committee cooperated with Cho Ray Blood Transfusion Center of HCM City and Red Cross Association of Tan Thanh District to organize the Voluntary Blood Donation Program in 2017 right at CSVC with the approval of the Company's Board of Management. Lots of CSVC members gathered at the Conference Room of the Administrative Building from the early morning to get consultation, health check and proceed blood transfusion process. Among those, some had donated blood several times before.

Currently, many hospitals need blood provided by the National Institute of Hematology and Blood Transfusion. However, a critical shortage of blood still occurs often as most of the blood supply come from patients' family and those who give blood for money.

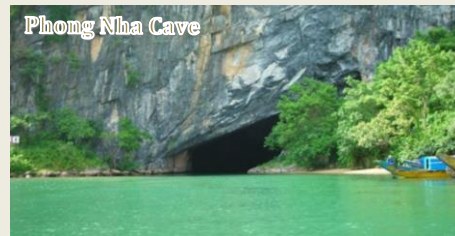

“A drop of blood to give – A lifetime to stay”. An unexpected accident could cause you a significant blood loss and threaten your life. Imagine it! You will truly perceive the importance and preciousness of each blood drop. The only condition is good health and willingness to share, your decision to donate can save 03 lives within 10 minutes of donation. Therefore, do not hesitate to give blood whenever possible and mobilize other people to get involved in this noble and meaningful activity!

On May 20th, CSVC organized a Job-fair at Ba Ria - Vung Tau Employment Support Center. The purpose of the program is to bring career opportunities and practical internships at a multinational corporation for graduates and those students who are going to graduate. The program has attracted the attention of students inside and outside the province. The event had attendance of members from Human Resources Department (M1) and General Affairs Department (M42) who enthusiastically provided students useful information and made them feel more confident in the actual interviews at the Company.

Some curiosity about Quang Binh has been so much excited after filmmakers of the "Kong: Skull Island" chose this place to shoot the main scene in their super-product. Quang Binh is a coastal province in the Central Land of Vietnam. Not only attractive to visitors by beautiful valleys, charming beaches and simple villages of local people among wild nature, it is also well - known as the kingdom of caves recognized among the most beautiful caves in the world because of their majesty. If you have a passion on adventure tours, Quang Binh is certainly a wonderful choice for you.

Located at Ke Bang Limestone Mountain in Son Trach Commune, Bo Trach District, 50 km northwest of Dong Hoi Town, Phong Nha Cave is long lauded as the "foremost grotto under the Southern sky" lushly shrouded in tropical forests of Vietnam. The Cave is 7,729m long, 83m deep, 50m high with countless big and small cave branches as Bi Ki, Tien, Cung Dinh... This is a water cave with a large underground river system and stalactites of different colors, shapes and sizes. For these features, Phong Nha Cave can be compared to a huge geological museum thanks to its complicated geological structure with different categories of stone.

Son Doong Cave, located deeply in Phong Nha - Ke Bang Park for millions of years, is the largest natural cave in the world. Following discoveries in 2009, it has aroused great curiosity among trekkers from throughout the world to come exploring and sightseeing. Son Doong stretches approximately 5km and measures 200m high and 150m wide, which means it can accommodate even a 40-storey skyscraper. Stalactites in Son Doong may shoot up as high as nearly 80m.

In 2005, a local accidentally discovered a cave of fanciful wonder situated in Km 16, about 4km from the west branch of Ho Chi Minh Road in Son Trach Commune, Bo Trach District, about 25km from Phong Nha cave, very convenient for moving. It owns a length of more than 31km, the width ranging from 30m to 100m, up to 150m at its widest point; The height from the bottom to the ceiling is about 60 - 80m. The British Royal Cave Research Association ranked this Cave as one of the most spectacular caves they have ever surveyed over the world, with its dazzling and marvelous beauty. From their fantastic imagination of a "Heavenly Palace" on earth, the Cave was then named "The Paradise Cave"

The Dark Cave was discovered by locals during the Vietnam War and used by soldiers and local militants as an air-raid shelter. The Cave has horizontal length of 5.558m, depth of 80m and height of 50m with 2 doors: front door borders Chay River and back door borders forest. It is known as a miniature version of Son Doong. In the rainy season when tide is high and results in thick mud sedimentation, a huge muddy pool is created to contain all integral minerals, making it an ideal destination to relax, massage and take a rest.

To reach the entrance of Thuy Cung Cave, you have to pass the vast grassy hills, trekking through Dau Rai primeval forest with hundreds of old trees having big trunks which can be hugged by three or four people and continue the journey in the jungle to finally experience the feeling of exotic and mysterious blue waters in the Cave, which made it another name "Blue Water Cave" when it was first discovered. After one night camping at Thuy Cung Cave, travelers have an opportunity to admire the dawn in Sinh Ton Valley (Survival Valley) of more than 2000ha, surrounded by majestic limestones and immense evergreen forest.

Tu Lan Cave is located at Tan Hoa Village, Minh Hoa District, about 70km from Phong Nha Cave to the northwest. The system comprises of 8 caves discovered in 2009 and 4 valleys explored in 2012, which is still largely pristine, hiding within secrets of the eternal nature deep beneath Limestone Mountains, underground currents and endless waterfalls. To reach Tu Lan, you are supposed to cross spiky mountains and vast valleys, wade over slippery mud and swim in cold streams at the temperature below 20oC.

Tien Son, or the Dry Cave, is one of the most magnificent caves in Phong Nha - Ke Bang tourist complex. The Cave uplink winding over halfway up the mountain, an altitude of about 200m above sea level. Discovered in 1935, it was originally called as the Fairy Cave thanks to its mysterious and otherworldly beauty. Tien Son Cave also owns another name of Dry Cave when people started to know the existence of Phong Nha Water Cave. The Cave is reputed as castle of stalactites for its magnificent and unique stalactites thousands of colors and shapes.

Coming to Phong Nha - Ke Bang Park, tourists will have a chance to admire the majesty of En Cave - the third biggest cave in the world. Here is an ideal stopover for those who love adventures but do not have much time. Being voted as one of the most spectacular caves in the world by the National Geographic (US), the cave boasts a distinct bio system and climate, not to mention a perennial forest and perfect river that ensure unique experiences for you all.

Above are just some of the typical caves in Quang Binh. There are many other small and large caves waiting for you to discover. I'm sure it will be an unforgettable experience in your life. TAKE YOUR BACKPACK AND GO!

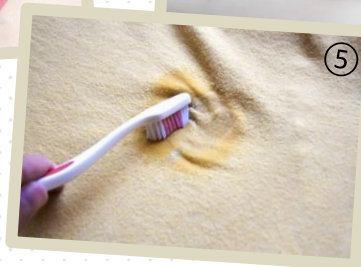

SEVERAL AMAZING USES FOR TOOTHPASTE

Besides keeping your teeth sparkly, toothpaste still have other effects that we can apply in daily life easily and conveniently. Let's discover the contingent effects of toothpaste.

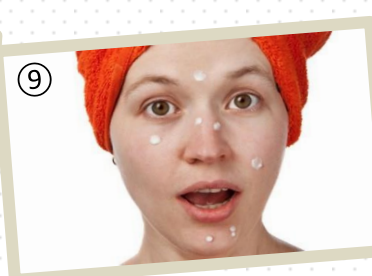

Clean up equipment

- ① **Clothing:** For stains on clothes, apply toothpaste directly to the stain and rub briskly until the stain disappears, then wash normally.
- ② **Spot on your shoes:** put a small amount of toothpaste on the surface of the shoe, waiting for 5 minutes and clean by brush, then rinse with water.
- ③ **Dull metal jewelry:** use a soft toothbrush with a tiny amount of toothpaste to brush it, then rinse and polish it to a shine with a soft cloth.
- ④ **Glasses:** The glasses we wear often include not only dirt, but also sweat and so on. Please use a toothpaste to clean it. First apply the toothpaste over the glass surface, use your hands rubbing it lightly, rinse off the toothpaste with water, and then wipe dry with a soft, clean, lint-free cloth.
- ⑤ **Stain in the carpet:** Apply the toothpaste on the stain, scrub it several times with a clean brush and rinse again.
- ⑥ **Dirt off the walls:** Use a damp cloth with toothpaste, then scrub the wall gently to make the stains on the walls disappear.
- ⑦ **Bottles:** Put a toothpaste into a moist towel, clean all over the face of the bottle, especially the stains, bottles will shine like new and be effectively deodorized.

Others

- ⑧ **Perfume your palms:** Cutting onions, cleaning fish, or handling garlic can leave a strong odor on your hands. Use toothpaste over your hands, rinse them with warm water, and the smell will be removed.
- ⑨ **Deflated Acne:** clean the affected area, then carefully cover pimples with a dab of toothpaste, leave it on overnight and wash your face the next morning for the best results.
- ⑩ **Reduce swelling from mosquito or insect:** When you got a mosquito or insect bites, you will feel pain, itching and uncomfortable. At that time, you just need to use toothpaste applied to the bite immediately and wait for the toothpaste dry, the swelling and itching will significantly reduce.
- ⑪ **Replace shaving cream:** not bad idea, but its effects are also quite good, the gentlemen can use toothpaste to replace shaving cream. It has more foam, fragrant, just clean without skin irritation.

* **Notes:** Just be sure to use the white pasty stuff, not gel.

Wish you have a successful experience!

To make CSVN Newsletter more interesting, M42 hopes to receive more articles contributed by all of you. The topic: working, daily life or anything that you think is interesting. You will get attractive gifts from the program after 2 weekly Newsletters if posted. Please send all information to M42 Ms. Nhi (yennhi@csvn.com.vn) or call to 389 (ext.)

The more articles, the more chances to receive gifts ☺

OUR QUALITY, YOUR BETTER LIFE!
